SYSTEM REQUIREMENTS:

Please [click here](#) for system requirements.

WEBINAR DETAILS:

The term Precision Turfgrass Management has been used since the mid 1990's to describe the use of advanced technology in turf and sod production. The good news is the tools of PTM are ready, proven and viable for golf superintendents today!

This webinar will discuss the various components of Precision Turfgrass Management: GPS data collection, CPS auto steer and application controls, data management and record keeping for Integrated Pest Management (IPM).

LARRY PRONG is a Crop Science graduate of the University of Guelph, Larry Prong has developed a diversified career - acquiring expertise in both agriculture and technology sectors. Early in his career Larry worked as a research technician with the university, conducting tillage conservation trials. During the swell of the technology sector in the mid-90's Larry's passion for computer technology lead him to PC hardware and software sales, then a software development position with a major Canadian insurance firm. Larry's agricultural roots pulled him back in 2004 and bringing his tech experience along he entered the realm of GPS and precision agriculture solutions. For the past 6 years Larry has been working in the agriculture sector developing innovative solutions using precision tools for effective cropping and IPM programs – improving efficiency and optimizing crop inputs and the machinery used to harvest/maintain the land. Larry is part of EFS Precision at Elmira Farm Service, one of the most highly qualified teams of GPS specialists in Ontario.

Education Credits: This webinar has been approved for 1.0 IPM points from BC Environment, 1 Alberta Environment point in Application Technology, 1.0 IPM points from NS Environment and .10 GCSAA points. Applications have been completed for ON CEC and Plant Health Atlantic points. Please check back for updates.
